

## Page containing list of links (navigation page): Formatting lists of links

What we refer to as "List of links pages" are those pages whose task is to channel the users to other pages **ONLY** the tag `<ul>` can be used to format a list of items. **DO NOT** use text-formatting tags (such as `<br>`, `<h1>`, `<h2>`, `<h3>`) to create a list.

### Syntax of the `<ul>` tag

- The `<ul>` tag is used to create an "Unordered List".
- The tag `<ul>` starts/identifies the list, while the nested tag `<li>` is used for items in the list.

Type of list	HTML syntax	Sample
Simple bullet list	<pre>&lt;ul&gt;   &lt;li&gt;Item 1&lt;/li&gt;   &lt;li&gt;Item 2&lt;/li&gt;   &lt;li&gt;Item 3&lt;/li&gt; &lt;/ul&gt;</pre>	<ul style="list-style-type: none"> <li>• Item 1</li> <li>• Item 2</li> <li>• Item 3</li> </ul>
Bullet list on 2 levels	<pre>&lt;ul&gt;   &lt;li&gt;Item 1     &lt;ul&gt;       &lt;li&gt;Item 1.1&lt;/li&gt;       &lt;li&gt;Item 1.2&lt;/li&gt;       &lt;li&gt;Item 1.3&lt;/li&gt;     &lt;/ul&gt;   &lt;/li&gt;   &lt;li&gt;Item 2&lt;/li&gt;   &lt;li&gt;Item 3&lt;/li&gt; &lt;/ul&gt;</pre>	<ul style="list-style-type: none"> <li>• Item 1       <ul style="list-style-type: none"> <li>○ Item 1.1</li> <li>○ Item 1.2</li> <li>○ Item 1.3</li> </ul> </li> <li>• Item 2</li> <li>• Item 3</li> </ul>

### Formatting rules and related classes

- The standard style sheet does not set any indentation in the list created with the `<ul>` tag, without a line between the items in the list and without any bullet points.
- Here follows the list of classes that can be assigned to the `<ul>` tag, in order to format a list

HTML syntax	Comments
<code>&lt;ul class="arhr"&gt;</code>	Red arrow bullet (used for list of links only)
<code>&lt;ul class="indent"&gt;</code>	Indented list
<code>&lt;ul class="noIndent"&gt;</code>	Non-indented
<code>&lt;ul class="space"&gt;</code>	Empty line between items in the list
<code>&lt;ul class="noSpace"&gt;</code>	No empty line between items in the list
<code>&lt;ul class="noSpaceLine"&gt;</code>	No empty line between items in the list, but with a horizontal line
<code>&lt;ul&gt;</code>	The tag <code>&lt;ul&gt;</code> with no classes assigned corresponds with <code>&lt;ul class="noSpace noIndent"&gt;</code>

It is possible to combine the classes in order to obtain several list types. For example

`<ul class=" arhr noIndent space">`

It creates a list without indentation, with the red arrow for bullets and with an empty line subdividing items. This is the standard format for list of links → [see the list on this page](#) or [see in the page](#)

## List grouped by category: how to format the list

In this case the list is grouped by category. [See example](#)

`<p class=" titleListSmall red bgBeige ">Title of the first group</p>`

The screenshot shows the ILO SRO-Harare website. The main content area is titled 'Useful Links' and contains a list of links grouped into two main categories: 'ILO, International Labour Organization' and 'United Nations and Worldbank'. Each category has a sub-header and a list of links. The first category includes links to ILO Headquarters, ILO Regional Office (Abidjan), and ILO/ASIST (Advisory Support, Information Services and Training). The second category includes links to ILO Headquarters, ILO Regional Office (Abidjan), and ILO/ASIST (Advisory Support, Information Services and Training). A red dot is placed on the first category header, and a red line points from the code example above to it.

```
<ul>
  <li><p class="titleListSmall red bgBeige">Title of the first group</p>
    <ul class="arhr noIndent space">
      <li>Item 1.1</li>
      <li>Item 1.2</li>
      <li>Item 1.2</li>
    </ul>
  </li>
  <li><p class=" titleListSmall red bgBeige ">Title of the second group</p>
    <ul class=" arhr noIndent space">
      <li>Item 2.1</li>
      <li>Item 2.2</li>
      <li>Item 2.2</li>
    </ul>
  </li>
</ul>
```

### Other types of title for the list

`<p class="titleListSmallNo">` : Small title without line  
`<p class="titleList ">` : Bigger title with line  
`<p class="titleListNo">` : Bigger title without line
